RUN THE WHOLE BUSINESS

The full system

£2,495 to build

£249 a month from launch

Run your business from your phone, from the office, or both.

- Enquiries, quotes, jobs and invoices in the app
- Staff access set around each person's role
- Connected office access for work at a desk
- Your website, service pages and local SEO

WEBSITE FIRST

Website and local SEO

£1,495 to build

£149 a month from launch

For a business that needs a properly built website and already has the day-to-day work covered.

- A website built around your services and work
- Written service and local pages within the agreed scope
- Enquiry forms and search setup
- The same platform, ready to add the app and office

With the full system: work from your phone or office, set staff access by role, and add users at no extra charge.

The website in both options

Up to ten launch pages, including up to five local pages. The page list is agreed before the deposit.

I write the launch copy from your business details and photographs. Two combined rounds of revisions are included.

Hosting, domain renewal, security certificate, backups and technical maintenance are included.

What the monthly covers

A monthly Search Console review and up to one hour of content work. I send you a short update on findings and changes.

Full system: one extra hour for configuration help or refresher training. Initial setup includes a one-hour handover.

Unused hours don't roll over. Faults in what I maintain don't use the allowances. Pay a year up front for twelve months at the price of 10.

Start with the website. Add the app and office later for £1,000 plus £100 a month. That reaches the full system price, with no website rebuild.

Agreed before I start

Half to book the slot. Half at the agreed go-live handover. Monthly care starts at launch. Extra pages, new layouts and work outside the scope are quoted separately. Bulk data migration, custom features and third-party integrations are quoted separately.

No minimum monthly term. One month's notice to stop. Your domain, content and data remain yours. The platform code stays mine. Existing clients keep their written agreements.
